COMPANY PROFILE

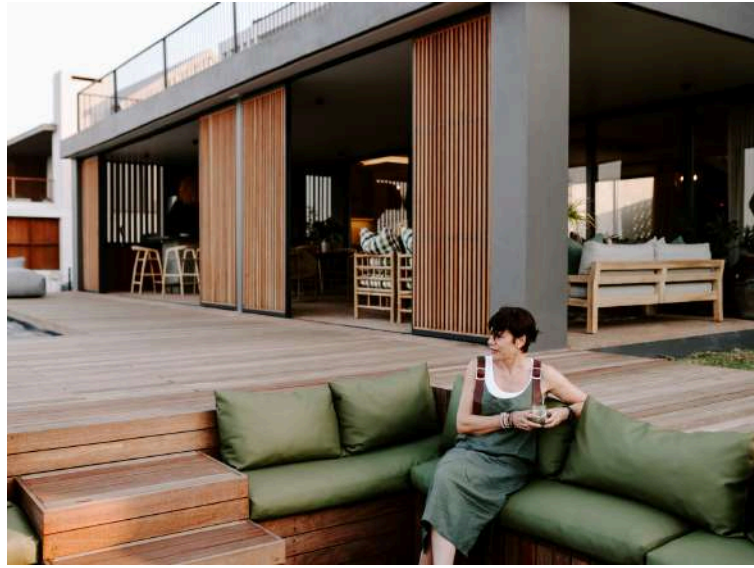

COMPANY PROFILE

Earlswood Shutters was established in 2005 as a local manufacturer of custom-made wooden shutters. Over the nearly 20 years of existence other complementary products have been added to the product portfolio. The focus has always been on local design, development, and manufacture using materials that are meticulously selected to provide a finished product of the highest possible standard and quality.

In 2022 SlimLine Metal Doors was added to the portfolio together with a range of Bespoke Screens. The rapid growth and demand for these new products necessitated a refresh in the brand and in 2024 Earlswood Shutters was transformed to Earlswood Living.

Our passion lies in Building Contemporary Designs and our goal is to create beautiful bespoke solutions that complement the aesthetics and add value and elegance to residential and commercial spaces.

LOUVRE SHUTTERS

Our solid **Wooden Shutters** offer a stylish alternative to traditional fabric curtains, drapes or blinds. Adjustable louvre shutters provide an effective way of controlling light and privacy and provide protection against direct sunlight on interior furnishings while still allowing natural airflow.

Our **Aluminium Shutters** have been developed with clean lines; they look elegant, smart and will suit the most sophisticated decor. Locally manufactured from 100% recyclable aluminium, with no corrosive components, our aluminium shutters are suitable for both indoor and outdoor applications.

Our **Aluminium Security Shutters** fuse elegance and style with strength and security. They are an extension to our aluminium range where the louvres have been extruded with a reinforced tube running the full length of the louvre. The shutter panels are fully lockable with a key which creates an almost impenetrable barrier.

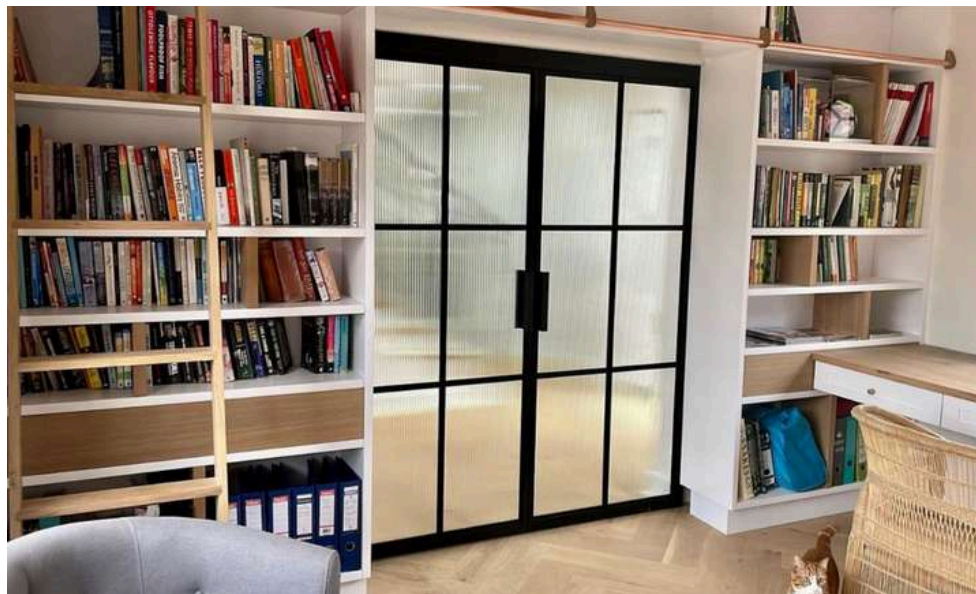

Our **Fixed Louvre Shutters** are manufactured from aluminium and are primarily used for external applications. They provide protection from wind, rain and heat and can be configured as hinged panels fitted either side of a window or sliding panels on a doorway or on a balcony.

SLIMLINE METAL DOORS

Our **SlimLine Metal Doors** is the most recent addition to our portfolio of products and introduces a contemporary industrial look into your home, office, or workspace. The slim frames with large glass panes have very narrow sight lines and allow maximum light to flow through your space.

BESPOKE SCREENS

Our **Bespoke Screens** are custom made to the unique requirements of the application for which they are being used. Typically, they have an aluminium frame with timber or aluminium inserts and suitable for both external and internal use. The material used is carefully chosen to suit both the aesthetic appearance and the durability required.

WHY CHOOSE US ?

Our shutters, screens and slimline metal doors are manufactured by us in KZN, when you deal with us you deal directly with the manufacturer.

With nearly 20 years' experience in the industry, we have a good understanding of what is required to meet our customer's expectations. We are involved in the complete process, from the time that the initial measurements are taken, proposal and concept design, manufacture right through to the final installation and hand over.

We have a fully equipped factory with "state of the art" machinery which allows us to manufacture custom-made solutions to your exact requirements, be it a special shape or a unique colour.

Since our products are all locally manufactured, we also carry spares which will give you piece of mind should something get damaged at some stage in the future we will be able to repair it.

Typical lead times, from final measure to installation is 4 weeks (20 working days)
